SUMMARY

Fullstack developer who builds the systems behind loan approvals, SaaS consoles and everyday business tools, from database schema and API to the screens people work in. Most of my work is software where correctness matters: loan computations that have to add up, maker/checker approval flows, and HR and academic records. Comfortable in PHP 8 / CodeIgniter and MySQL day to day, and in React, TypeScript, Node.js and PostgreSQL.

EXPERIENCE

Questronix Corporation — Apr 2026 – Present

Fullstack Developer · Outsourced to a banking client (salary loans)

CodeIgniter 3 · PHP 8 · JavaScript (ES6+) · MySQL · MariaDB

- Ship features end to end in the bank's loan origination system, from database tables to the screens loan officers use.
- Write PHP 8 business logic for loan applications, validations and computations (re-loans, rebates, take-home pay checks).
- Build dynamic forms, client-side validation and asynchronous screens in ES6 JavaScript.
- Design and tune MySQL / MariaDB queries behind the loan pipeline.

Freelance — Apr 2025 – Present

Software Developer · Remote contract work

React · TypeScript · Node.js · NestJS · PostgreSQL

- Build web applications for clients in React and TypeScript on a Node.js and PostgreSQL backend.
- Create reusable UI components and keep state management and API layers clean.
- Improve performance with memoization, lazy loading and careful rendering; refactor legacy components into a modular frontend.
- Work with backend engineers on data flow, feature planning and UI/UX decisions.

Ascendion — Aug 2024 – Mar 2025

Engineer · Banking client · formerly Collabera Digital

Node.js · React · JavaScript · SaaS · Cybersecurity

- Managed development and staging environments for SaaS authorization and security applications.
- Led deployments from development to staging, including backups and environment alignment.
- Coordinated release cycles with platform owners and development teams, and ran change management.
- Made deployments more reliable and reduced inconsistencies between environments.

Questronix Corporation — Jan 2022 – Aug 2024

Fullstack Developer II · Banking client

PHP · CodeIgniter · JavaScript · MySQL · Bootstrap

- Designed and built fullstack web applications on CodeIgniter and MySQL, including a bank's loan origination system.
- Built REST APIs and integrated third-party services.
- Improved application performance and database efficiency.
- Turned requirements from product managers into technical solutions; led debugging and upgrades across modules.

Pinnacle Technologies **Sep 2019 – Aug 2020**

Web Developer

PHP · CodeIgniter · HTML · CSS · JavaScript

- Built and tested modules for AIMS, an academic information system used by schools (student portal, subject registration, assessments).
- Built responsive interfaces and connected backend services and databases to the front end.

Earlier

BIGO Live · Content Moderator **Aug 2020 – Dec 2021**

Autumn · Web Developer, project-based (HRIS in CodeIgniter) **Nov – Dec 2020**

Lighthouse Enterprise · Graphic Designer **May – Sep 2019**

PROJECTS · LIVE DEMOS

LOS — Loan Origination System pearljan08.github.io/demo/los

Salary-loan origination: re-loan computations, Rule of 78 rebates, take-home pay checks, amortization schedules and a maker/checker approval flow with an audit trail.

HRIS — Human Resource Information System pearljan08.github.io/demo/hris

Employee records, leave and overtime approvals with balance and holiday rules, semi-monthly payroll with locked cutoffs, and supply requisitions with issue slips.

AIMS — Academic Information Management System pearljan08.github.io/demo/aims

Subject enlistment with prerequisite, schedule-conflict and unit-load checks; assessment and statement of account; registrar validation; faculty grade sheets.

SKILLS

Backend	PHP 8, CodeIgniter, Node.js, Express, NestJS, REST APIs
Frontend	React, TypeScript, JavaScript (ES6+), Vue, Tailwind CSS, Bootstrap
Data	MySQL, MariaDB, PostgreSQL, query tuning
Practice	SaaS architecture, deployments and staging, environment alignment, change management, performance tuning

EDUCATION

University of Caloocan City · BS Information Technology **2019**
